

AP-YV1303 Static Measurer

Product Overview

The AP-YV1301/1302/1303 type static meter is a test instrument developed by Anping Company to detect the electrostatic voltage on the surface of electrostatic objects. It uses non-contact measurement technology to influence the electrostatic field of the surface of the object. Minimized to ensure the accuracy of measurement, can be widely used in electronics, plastics, chemicals, printing, optoelectronics and other industries.

The product features

- 1. Feel comfortable and beautiful in appearance.
- 2. Double LED precise positioning and accurate detection distance.
- 3. The detection potential range is wide and the detection accuracy is high.
- 4. The button operation is comfortable, easy to use.
- 5. High-definition, full-scale LCD data display.
