

BK-GS4000/BK5500 Handheld Static Eliminating Gun

Ionizing Air Gun is a highly efficient static elimination device that rapidly blows a large amount of positive and negative ions to the area where the static electricity needs to be removed and neutralizes the electrostatic charge accumulated on the object. At the same time, the high-speed ion gas stream blows the dust particles attracted by electrostatic attraction and prevents them from attracting the dust particles. Widely used in electronics assembly, microelectronics, biological products, pharmaceutical, injection molding, printing, plastic dust-free casing dust-free coating lines and other industries.

- Balance , fast static elimination
- Stable voltage balance, easy to move and position
- Built in noise eliminator
- Electric indicating, safe to operate

Specifications

Model	BK-GS4000/BK5500
Output Voltage	4Kv AC
Power Rating	<35W
Air blowing	=3.3m ³ /min
Discharge Time	<2s
Dimension	390(L)X114(W)X206(H)mm
Ion Balance	±10v
Capacity	165LX105WX115Wmm
Gross weight	3.45kg
