

AT-5

Engine Tachometer The AT-5 tachometer can measure RPM of engine by bringing it close to plug cord of the engine. This tachometer has many measuring modes for various types of engines like 2 stroke (1 and 4 cylinders), 4 strokes(1, 6 and 8 cylincers). An antenna lead is supplied to use if needed. Measuring method count pulses RPM display interval 0.5sec Accuracy ± 10 RPM

Specifications		
Measurable Engine		Measurable RPM Range
Stroke	Cylinder	
2	1	100~20000
4	2	
4	3	100~13000
2	2	100~10000
4	4	
2	3	100~6500
4	6	
4	1	100~20000
4	5	100~7000
2	4	100~4800
4	8	

Size(HxWxD): 156mm x 42mm x 20mm

Weight: 77g

Accessories:

Antenna lead and hang strap, Gift box with carrying case.
