

## PHOTO-2000Z Multiphotometer (Lux meter, luminance Photo-current meter)

PHOTO-2000Z is portable instrument, not only suitable for laboratory, quality inspection department and R&D department, also can be used in the industrial and commercial field measurement. It can test luminous flux (equipped with integrating sphere) and illuminance.esting.

Model	PHOTO-2000Z
Function	Illuminance lumen(with integrating sphere)
Detector	Silicon optical device
V( $\lambda$ ) matching error	$f1 \leq 3.5\%$ (class standard)
Illuminance Range	Lux : 0.01lx~200klx ; Lumen : 0.01lm~200kl
Accuracy	Lux : $\pm 4\%$ (according to JJG245-2005) Lumen : depends on system
Display	5 digit display
Communication	RS-232-C port, special software
Holding function	Holding the readings, easy to read
