

Model DC-2000-C: Wood Moisture Meter

Standard: The Model DC-2000-C-#1 Wood Moisture Meter offers a heavy duty electrode that utilizes four tempered needles with a penetration depth of about 7/16".

Premium: The Model DC-2000-C-#2 Wood Moisture Meter offers a heavy duty electrode that utilizes four tempered needles with a penetration depth of about 7/16" and a Sliding Driver Handle.

Heavy Duty: The Model DC-2000-C-#3 Wood Moisture Meter offers a heavy duty electrode that utilizes two insulated tempered needles with a penetration depth of about 7/8" and has a Sliding Driver Handle.

Product Description

The Model DC-2000-C wood moisture meter is a versatile instrument with the availability of three different Needle Electrodes that can be used on all wood applications from kiln-dried to air-dried woods. The top of the electrode assembly is made of durable Cicolac plastic to withstand hard usage and the heavy duty needles are designed for use on the most dense wood, yet can be withdrawn after tests without breakage or bending.

Model DC-2000-C Wood Moisture Meter Options:

Standard: The Model DC-2000-C-#1 Wood Moisture Meter offers a heavy duty electrode that utilizes four tempered needles with a penetration depth of about 7/16".

Premium: The Model DC-2000-C-#2 Wood Moisture Meter offers a heavy duty electrode that utilizes four tempered needles with a penetration depth of about 7/16" and a Sliding Driver Handle.

Heavy Duty: The Model DC-2000-C-#3 Wood Moisture Meter offers a heavy duty electrode that utilizes two insulated tempered needles with a penetration depth of about 7/8" and has a Sliding Driver Handle.

Additional Information

Process	<i>Handheld</i>
Pin Feature	<i>Pin</i>
Contact Feature	<i>Contact</i>
Measurement Method	<i>Radio Frequency</i>
Reading Feature	<i>Digital</i>
DC 2000 C	<i>Heavy Duty, Premium, Standard</i>
