[PRODUCT DETAILS](#) [PRODUCT VIDEO](#)

Instruction:

Brake pad shear testing machine is a new generation of microcomputer-controlled compression and shear testing machine designed specifically for road vehicles, brake linings and other mechanisms. This machine fully complies with "GB / T22309-2008 road vehicle brake lining disc brake block assembly and drum brake shoe assembly shear strength test method". The design of the main machine and auxiliary equipment of the testing machine draws on advanced technology, beautiful appearance, convenient operation, stable and reliable performance, no pollution, low noise and high efficiency. And all the test operations can be completed automatically on the computer through the mouse. Good humanized design makes the test operation more convenient.

Specifications:

Max. Test force	100KN
Accuracy	1Class
Measurement range	2%-100%
Test force accuracy	Better than ±1%
Displacement resolution	0.01mm
Displacement measurement accuracy	Better than ±1%
Test speed range	Customize equipment, according to the actual parameters
Test space	Customize equipment, according to the actual parameters
Dimension	1800*600*1300mm
