

GDH-100 Contact Resistance Tester

Product Description

GDH-100 Loop Resistance Tester is designed to measure circuit loop resistance(contact resistance) of high/low voltage switch,power cable and wires,and weld joint.It is also known as Micro-ohmmeter.

Features

- Four leads measurement method, high Accuracy.
- Adjustable testing current and low ripple.
- Two 31/2 LED windows to display Current and Resistance.

- Over-current and Over-heat protection.
- Easy to operate.
- Portable,high precision.

Specifications

- Input voltage: AC220V \pm 20%,50HZ
- Output current:: DC 0-100A continuous adjustment
- Accuracy:0.5% \pm 1digit
- Resolution: 1 $\mu\Omega$
- Measure range: 0-1999 $\mu\Omega$
- Dimension: 36 \times 27 \times 23cm
- Weight: 7.5kg
