Digital display push pull meter

L-P01

1. Product use

Table-top thrust testing machine is suitable for tensile testing of plastic, rubber, electronic parts and other small parts. It is easy to operate and a good helper for related manufacturers and related quality inspection doors.

2. Functional characteristics

Table thrust testing machine table is not only limited to tensile testing, but also can do thrust testing. Can be synchronous test software, the realization of synchronous test function, can connect the computer test, synchronous display test force curve and testing process detailed test records, and can save, print, do all kinds of analysis, input speed, area still can show the parameters such as displacement, pressure, and test data can be imported word, Excel and other office software for further statistics and analysis. Simple operation, widely used in industry, scientific research departments, laboratories and so on.

3. Product parameters

1. Maximum tension: 50kg(commonly used 20kg, 50kg, please point out to be customized)
2. Sensing method: push pull meter/load element
3. Load precision: within $\pm 1\%$
4. Effective stretch: 300mm (not including clamp)
5. Test speed: 10-200mm/min
6. Safety device: upper and lower limit protection
7. Power supply: 220V/AC50Hz 8. Weight: about 25kg

4. Basic configuration

1. One host machine
