UAC 110

With the USC 110 A/D converter, the EFM120, the hand-held electrode MEL, the gage head MK11S2 and teflonized measuring line (3m or 5m) you can perform a walking test according to EN 61340-4-5.

The device is connected via USB to any computer with Microsoft Windows (Windows 98 or newer).

The data can be read out with our enclosed software.

Specifications:

resolution:	10 bit
input voltage:	±1V
accuracy:	±1%
power supply:	via USB
current consumption:	40 mA
dimensions:	58 x 24 x 69 mm (B x H x T)
