Description

Fault finding on transistors by the MOS transistor testing selector:

- Measure parameters: Open voltage U_{GS} (th), internal resistance R_{DS}, Transconductance gm, Withstand voltage V (BR) DS
- Test range: U_{GS} (th) 0.1-9.9V; R_{DS} 0.001-9.999Ω gm; 0.10-10.00s; V (BR) DS 50-650V
- Test current range: 0.1A-5A adjustable, comply with different working situation
- Automatic selecting, out of limit alarming, advance the work efficiency
- The technique of testing R_{DS} under the big-current, is advanced technique
