

8800A Economic Portable combustible gas detector

Description:

The 8800B portable combustible gas detector adopts the high quality and high performance catalytic combustion sensor with high sensitivity, good reliability, fast response and high stability.

Technical Parameter:

Gas type	Combustible gas
Detecting range	0~100%LEL
Resolution	1%LEL
Response time	T90<60S
Accuracy	±5%F.S
Sensor type	Catalytic combustible sensor
Probe length	300mm
Alarm mode	Sound, light and Vibration
Alarm point	Low alarm point 10%LEL; High alarm point 20%LEL
Working environment	Working temperature: Normal ambient temperature; Working Humidity: 15%~95%RH(Non-condensation)
Power supply	3 AAA/7 alkaline battery

Applications:

The Portable Combustible gas detector can be used in the department of petroleum,

petrochemical, oil depots and gas stations and oil gas transmission and distribution pipeline safety inspection and pipeline maintenance and leakage and rescue etc., gas industry essential leak detection equipment.
