

Product Informations

Our Product Lineup

High Frequency Air Ionizer

[Outline view](#)

[Specification](#)

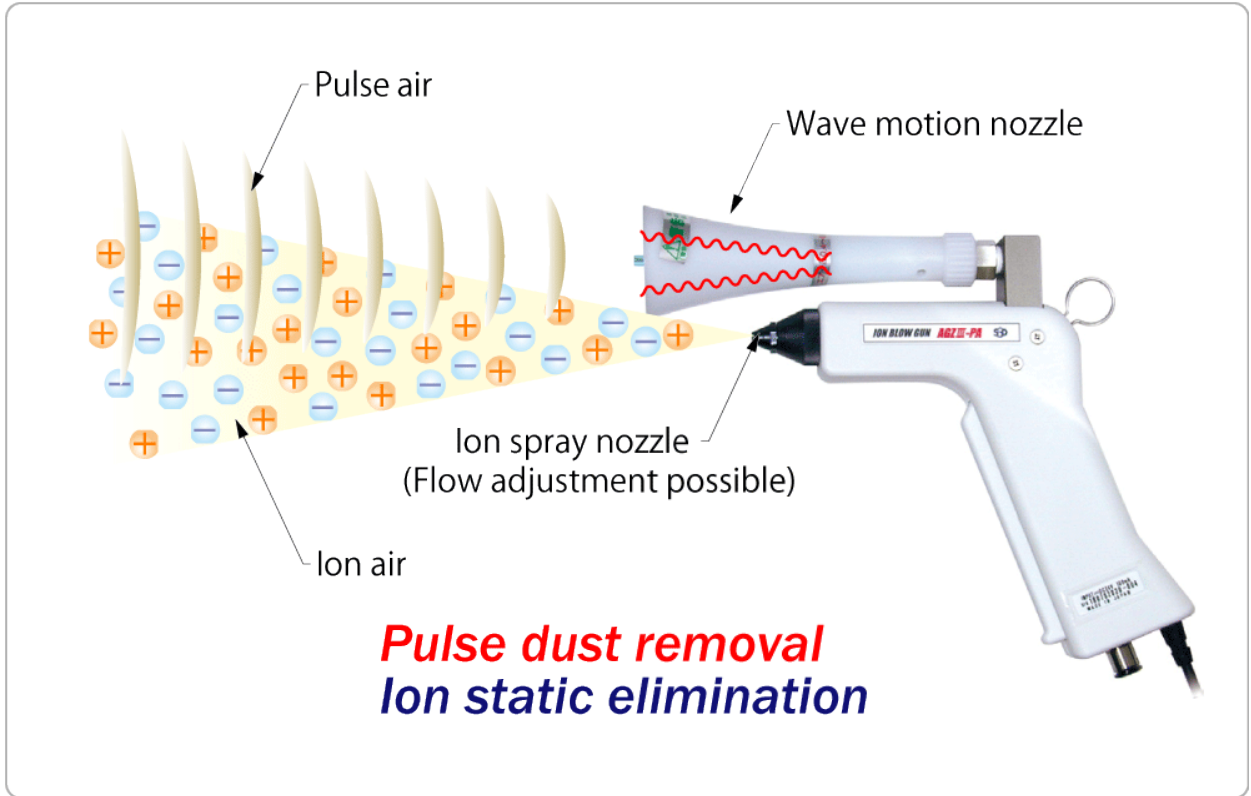

Feature of the product

The PIEZONIZER AGZIII-PA is a compact and lightweight ionized air gun. The dust can be blown away by the powerful high pulse generated by the wave motion type of nozzle to eliminate statics attached on the charged objects.

- The lightweight (290g, cable not included) handy-grip type of air gun improves the work efficiency.
- Powerful dust remover by wave motion nozzle
- High frequency AC enables good static elimination performances and ion balance.
- Highly flexible cable (accessory).
- No need for extra controller as high voltage power and air valve is equipped in the main unit.

Pulse dust removal and Ion static elimination

Specification

PIEZONIZER AGZ III-PA	
Model	AGZ III-PA
Input Power	DC24V(AC Adaptor AC100 ~ 240V available)
Current	About 100mA
Output Voltage	AC2000V (High Frequency AC)
Display	Green: Power Normal, Red: Power Abnormal
Weight	290g (with nozzle and main unit,without cable)
Dimension	210x25x180 mm (LxWxH)(with nozzle)
Ion Balance	Below $\pm 30V$
Ozon Level	0.04 ppm or less(at 200 mm)
Air Supply	Clean and Dry Air
Air Pressure	0.3 ~ 0.6 MPa

Environment	0 ~ 40°C (no condensation)
Accessories	Manual, AC Adaptor, Wave Motion Nozzle
