

SMD CHIP COUNTER

COU2000 ADV

APPLICATION

By using the principle of photoelectric sensing, COU2000 Series SMD Chip Counter can take the advantage of the relations between the sprocket holes and the chips and count the SMD chips accurately and quickly. It is the high-efficient auxiliary equipment for SMT material management.

FEATRUES

- High accuracy, error free.
- Suitable for packaging of SMD tape & reels
- It can also count the parts with the reversed direction and can double-check and conduct pre-set counting.
- Easy operation, unique design for preventing the tape from dropping, which minimizes the damage to the tape.

SPECIFICATION

- Power: AC110 60Hz/220V 50Hz; 25W.
- Dimension: 410×235×240mm W×D×H
- Weight : 9 Kg

OPTIONS

- Label printing
- Bar code copy

HIGHLIGHT

Low cost expansibility:

Thermal Transfer Printer may be selected as the output device to print the labels, and the bar code reader may also be employed to copy the bar code on the original reel onto the new label, the printed label will contain time, quantity and the bar code information of component, which may be treated as the type-in information of material animated management.

Patent Exterior:

The tilted operation panel can make the user watch the LCD and the chips in the carrier. It complies with the design of human engineering.

COU2000 EX equipped a fiber sensor to stop counting and sounds an alarm when it detected an empty pocket, then a display will be arised as following:

***PCS CHIPS LOST
CHECK IT PLEASE

COU2000EX
空料侦测型

**The transparent carrier tape is invalid
