## UP-6193 Falling ball impact testing machine

### **Description**

The machine with a certain weight to adjusting steel ball at a certain level, Hit the sample, depending on the degree of sample damage, to determine the test the quality of the products.

### **The technical specifications**

- 1,ball falling drop height: 0 ~ 2000 mm is adjustable
- 2, ball falling control mode: dc electromagnetic control
- 3, ball weight: 112, 198, 225, 198, 225 (according to customer request custom -made)
- 4, power supply: 220 v, 50 hz, 2 A
- 5, dimension: 40 \* 50 \* 200cm
- 6, weight: about 40kg
- 7, coaming height: 200 mm, 13 mm thickness of steel plate (standard) products, at the bottom of the effective impact height 2 meters
