

UP-6196C Automobile Temperature Humidity Test Room

Walk in temperature humidity test machine is used for light-duty testing or long-term steady-state evaluation of pharmaceuticals and other products to do the low temperature,high temperature,the charge of high low temperature,constant humidity and heating,high-low temperature alternating humidity and heating test. Provide large-scale parts,semi-finished product,finished product for large-scale temperature and humidity testing environment space for industry.It mainly composed of control panel,switchboard, monisturizing base plate blower,heating machine,humidity machine,refrigerator.

Feature:

1.Modular insulation panel, CAM hook, Installation is simple, easy to install

- 2.Refrigeration: R22, R404A, Glycol Secondary Refrigerant
- 3.Temperature Range:
From -160°C,-150°C,-120°C,-100°C,-80°C,-70°C,-60°C,-40°C,-
20°C,0°C~+150°C,200°C,250°C,300°C,400°C,500°C
- 4.Room Size: According to the customer request design
- 5.Functions: Keep Fresh, Frozen, Quick-Freeze, Fire-Proof
- 6.The world famous brand refrigeration fittings
- 7.Long life cycle
- 8.PID controller,easy to operation and management
- 9.Defrost Type: Electric defrosting,water defrosting
- 10.High efficiency and energy saving design
