UP-6309B Package Double-Wing Drop Test Machine

Design Standard:GB4757.5-84 JISZ0202-87 ISO2248-1972(E)

Uses:Our drop testers can determine the ultimate dimension in drop testing and incline impact testing for product and package performance which uses as reference to improve the packing. Special fixtures are available to allow for corner and edge drops.

Character:

Advanced structure ensure that bracket and specimen separate freely and specimen drop freely through bracket rapid downward motion then rotation movement. It delivers perfect test for specimen side, edge and corner.

Specifications:

Test height 35~150cm

Weight of specimen not more than100kg

Test space 800mm

Height adjustment power driven

Display modes digital
Drop method Electromagnetic control

Fitting modes side, corner, edge
Power of motor 1.85KWA
Power 1 ϕ , 220V/50Hz
Weight 500kg
