

UDP6722

New Product

Programmable DC power supply

Product Introduction

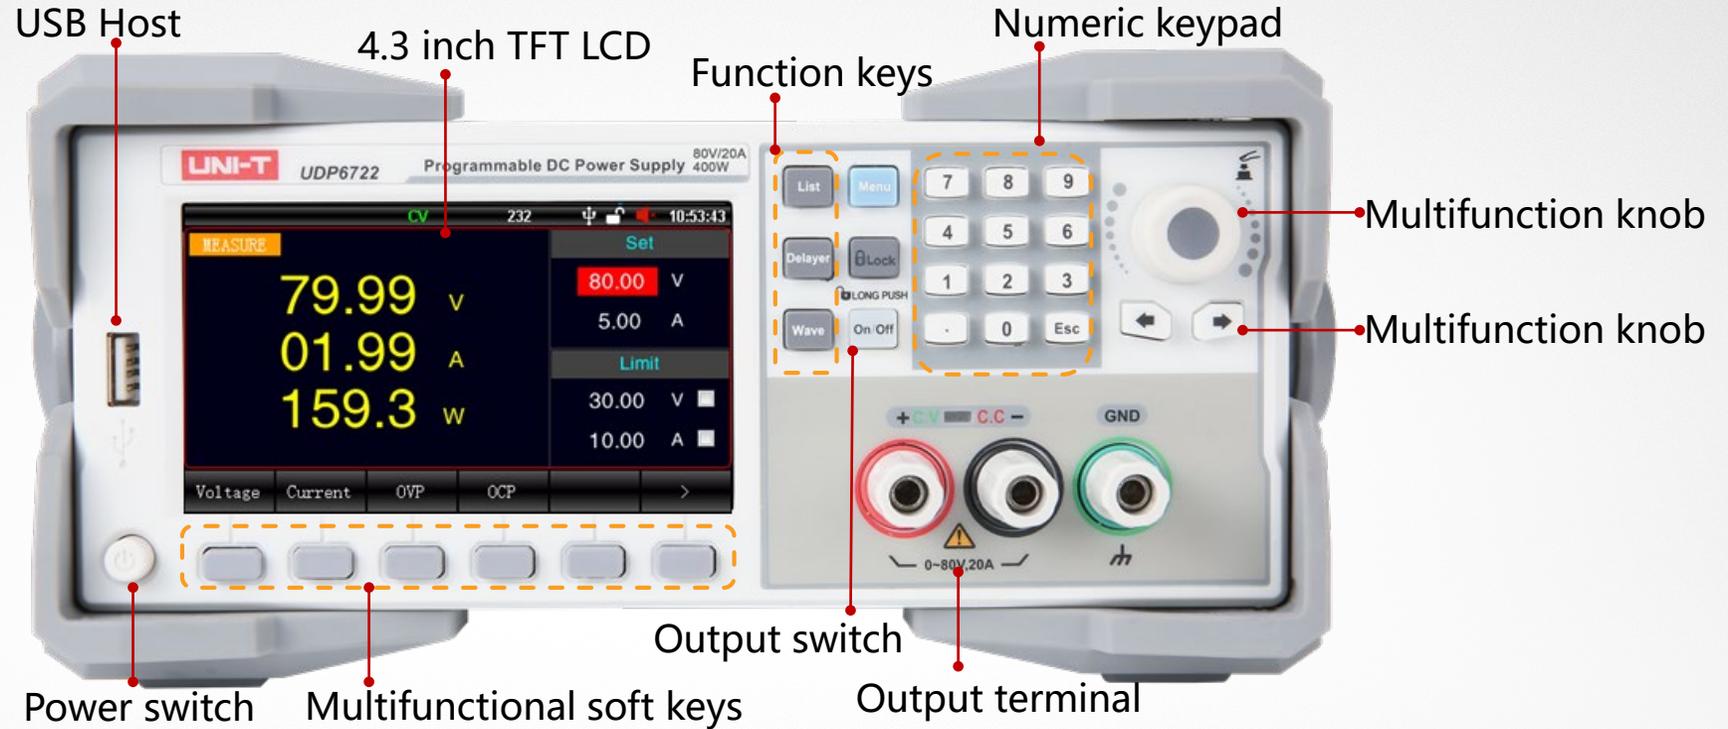

UNI-T®

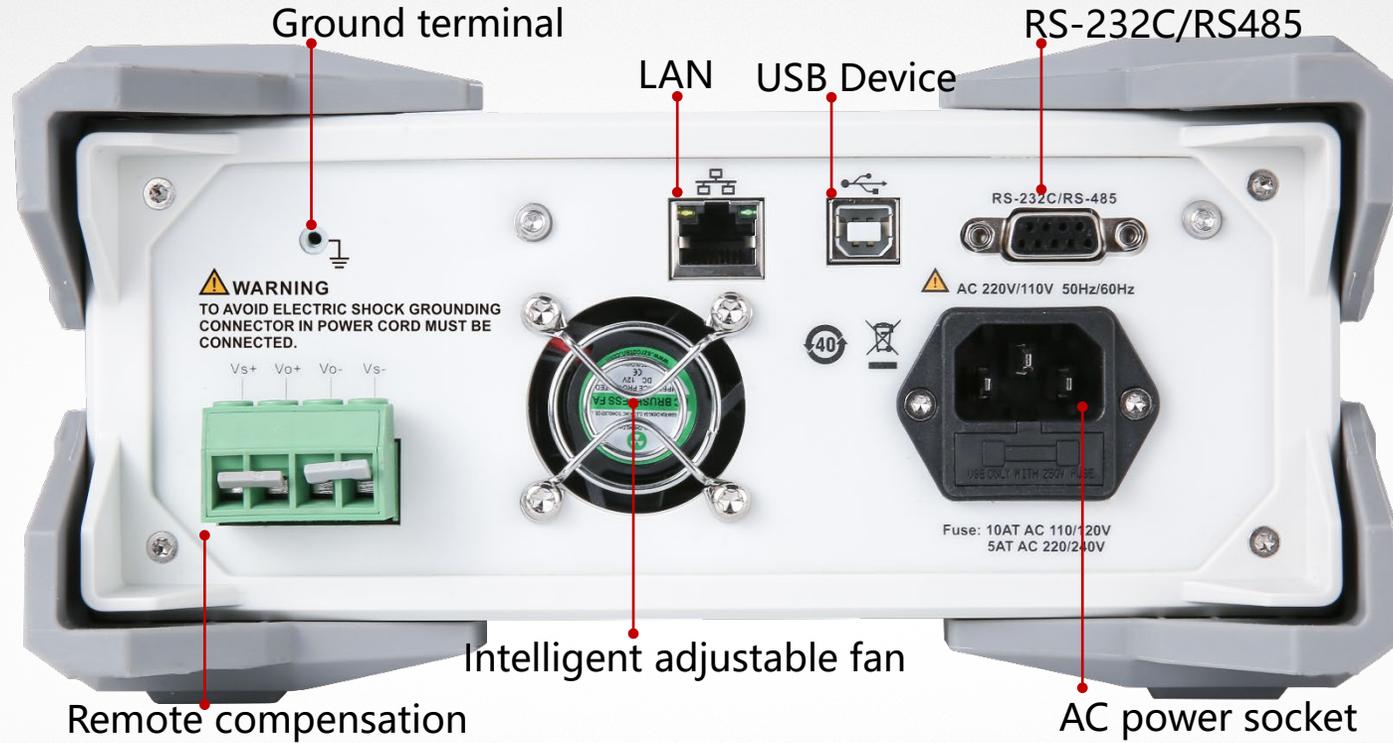

UDP6722 programmable DC power supply is a **wide range switching** power supply. This model has the characteristics of small size, light weight and powerful functions; it adopts **4.3inch** LCD screen, intuitive parameters and quick operation; it can be used in automatic test system, product development and debugging, laboratory, teaching experiment, mobile phone home appliance repair and other fields.

- **80V/20A/400W** wide range output
- **4.3-inch** TFT-LCD display
- High precision and low ripple
- OVP, OCP, OTP
- **Remote compensation** function
- **List, delay** function, simulate a variety of loading conditions
- Voltage, current and power **waveform display**
- Fan intelligent adjustment
- Abundant interfaces: **RS232, RS485, LAN, USB Host, USB Device**
- Support **SCPI/MODBUS** protocol
- Supporting **host computer software** to realize remote operation and monitoring

Product Comparisons

UDP6722

UDP6722

Channel: 1
Voltage: 80V
Current: 20A
Power: 400W
Resolution :10mV/10mA
Display: 4.3 inch LCD
Communication Interface: RS232,RS485,LAN,USB device

IT6722

IT6722

Channel: 1
Voltage: 80V
Current: 20A
Power: 400W
Resolution :10mV/10mA
Display: VFD
Communication Interface: RS232,USB device, GPIB

Product Comparisons (VS UNI-T Self)

Model		UDP6722	UDP6730	UDP6731

Product Features

- The **list mode** provides a sequence output of up to **200 steps** to suit various output needs.

The screenshot shows a device interface in 'LIST' mode. At the top, it displays 'OFF LIST 232' and the time '10:45:31'. The interface is divided into several sections: 'SETUP', 'LIST', and 'DElayer'. The 'LIST' section shows a sequence of steps with parameters: FileNum, Start, Group, Repeat, Finish, and Enable. The 'DElayer' section shows a table of steps with columns: No., Volt/V, Curr/A, and Time/s. The table has 10 rows, with the 4th row highlighted in red. At the bottom, there are buttons for 'Basic', 'Reset', 'Step', 'Voltage', 'Current', and 'Time'.

FileNum	Start	Group	Repeat	Finish	Enable	No.	Volt/V	Curr/A	Time/s
File:1	000	008	0001	Stop	On	0	6.00	1.00	1.0
						1	4.00	1.00	1.0
						2	6.00	1.00	1.0
						3	10.00	1.00	1.0
						4	3.30	1.00	1.0
						5	10.00	20.00	5.0
						6	6.00	20.00	1.0
						7	4.00	20.00	1.0
						8	3.30	1.00	1.0
						9	1.00	1.00	1.0

Product Features

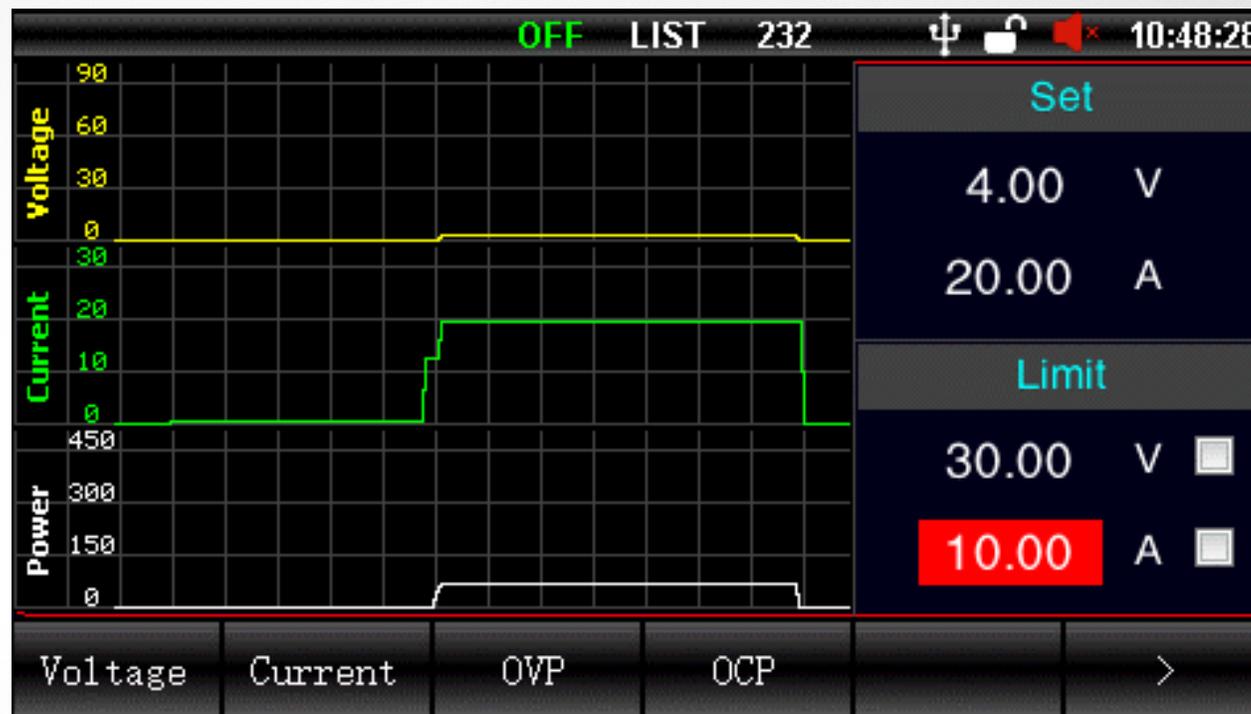

- The **delayer mode** provides a sequence output of up to **200 steps** to realize automatic multiple power-on/off operations.

FileNum	File:0	No.	On/Off	Time/s
Start	000	0	On	0.1
Group	009	1	Off	3.0
Repeat	0001	2	On	1.0
Finish	Stop	3	Off	3.0
Enable	On	4	On	1.0
		5	Off	3.0
		6	On	1.0
		7	Off	3.0
		8	On	1.0
		9	Off	3.0

Product Features

- Intuitive voltage, current, power waveform display

Product Features

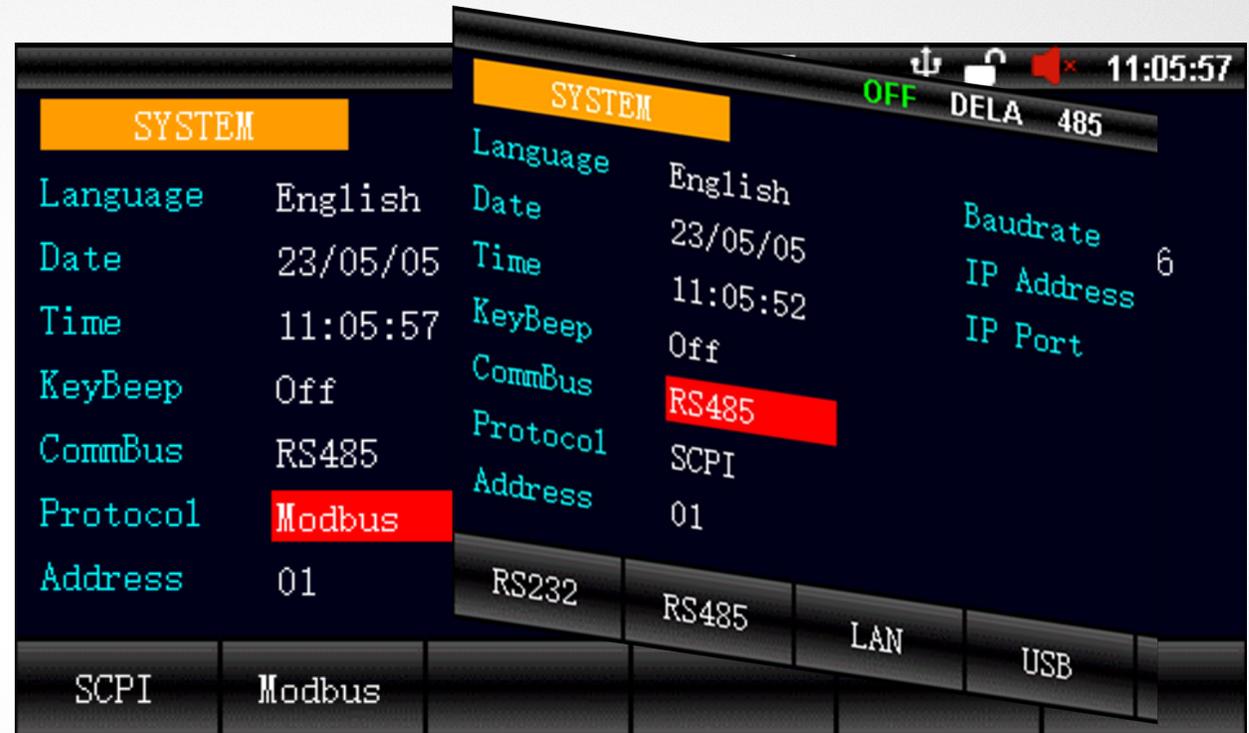

- 4.3 inch true color LCD display

Product Features

- Support **SCPI, MODBUS** dual protocol
- With **RS232, 485, LAN, USB** multiple interconnection ports

Product Features

- Perfect **file management** function. 100 configuration files, 40 delayer files and 40 list files can be saved

No.	Name	CreationTime	PoweronLoad	AutoSave
0	DefaultList	22-12-01 08:59:59	No	No
1	ListFile_1	23-05-04 16:55:19	Yes	No
2	ListFile_2	23-05-05 10:43:41	No	No

|| Product Features

- The **output duration** and **boot-up** can be set

Selling Points

Feature	Advantage	Benefit
Wide range output	Maximum output: 80V, 20A, 400W。 One replaces multiple power supplies	Save space and money
The output curve display	Curves display voltage, current, power change trends, the test process is more intuitive	Improve user experience
List function	The power output sequence can be easily edited to meet the needs of multiple changing power sources	Boost for automated testing
Delayer function	The delayer can realize the power off and on multiple times, providing a solution for the switch machine test	Save manpower and tedious operations
Support dual protocol	Support SCPI and MODBUS dual protocols to meet the remote control of more application scenarios	Faster integration into existing automation systems
Multiple interfaces	USB Host and USB Device, LAN, RS232, RS485 various interconnection ports	Stronger adaptability, adapt to more scenarios
File management	Support local and U disk to save multiple sets of setting files, list files and delayer files. With the function of automatic loading and automatic saving, it is more convenient to call and use	Support multi-machine copy, improve work efficiency
Save screenshot	One-click screenshot of important test interface for later analysis	Saves the operation of photo editing
Timing output and automatic start-up	The user can flexibly set the output duration according to the specific application scenario, and the output will be automatically output when the power is turned on	More flexible to meet application scenarios
Remote compensation	The remote compensation function can solve the problem of long wiring loop and obvious voltage drop	More accurate measurement
4.3 inch full color LCD	Comprehensive information display, color separation to display different content more convenient to use	Human-computer interaction is easier
PC remote control	Standard host computer software, which can remotely monitor and analyze the power supply	Man-machine separation
