

Professional Soldering Station

Model: LF-1700
Professional Solder Station

Professional 100W Soldering Station

Features:

Soldering Station is high-power free-lead soldering station, return temperature quickly, application lower-temperature welding.

1. Compound soldering tip design, Exothermic Material & soldering tip together, consumption power 80W. It returns heating quickly, application lower temperature & free-lead soldering.
2. Function indicator, error warning, equipment, Exothermic Material core, circuit-board mistake. Affecting error signal, awaking worker repair it.
3. It's easy to operation for distance between soldering tip and portable handle.
4. Lighter portable handle, it's excellent for a long time using.
5. Change soldering tip facility, replacing by using resistance heating material.
6. The temperature on the panel of the LF-1700 temperature-control soldering station is displayed digitally with the adjustment range from 1150°C to 480°C. The digitally displayed temperature on the panel can be adjusted to set thus setting all the required temperatures for operation and such a setting is very accurate.

Our Services

1. Credibility: Our customers are located all over the world.
2. Gratitude: We cherish and feel grateful to every customer for the business you give us. We are your reliable partner and will return to you with good products and good support.
3. Professional: We have been in this business for more than 30 years. We have a strong professional team with various experiences.
4. We keep doing new product development. Our goal is to enhance our competitive capacity constantly.
5. Price: we always offer competitive prices and help our customers to cost down.
6. Quality: we do 100% inspection before the shipment.

Specification:	
Input Power	100-120Vac 60Hz / 220-240VAC 50Hz
Wattage	100W Watts
Temperature Range	200°- 480° C
Standard Tip	44-510601
