

**Lead Free Soldering Station
Model: LF-3500**

Heavy Duty High Power 150W Soldering Station

Features:

1. Designed to be user-friendly

Small footprint.

Compact station body.

Simple and easy operation:

Operation is simple and easy. Even if you're not familiar with operation of machines, you can operate it without difficulty.

Iron holder with full of functions:

An iron holder of the same color of a soldering station comes as a set. The highly functional iron holder not only improves ease of use, but also brings a sense of visual consistency to the work environment.

2. Strict temperature management

Digital display

The LF-3500's digital display makes it easy to check the set temperature at a glance.

Password function:

Settings can be locked using a password to prevent them from being changed unexpectedly. Of course, it is possible to restrict all setting changes or prevent users from switching to particular modes. It allows you to choose a style of usage best suited for your worksite.

Preset mode:

This feature is very convenient when you want to change the set temperature to suit a particular workpiece, component, or tip shape. Simply select the desired temperature from a selection of preset temperatures registered in advance. Preset mode can save your trouble and improve workability.

Adjustment mode:

* Temperature adjustment is an essential part of any strict quality control system. With adjustment mode, what used to be a troublesome procedure is now as simple as entering the measured tip temperature to LF-3500.

* Adjust the tip temperature to match the set temperature in case that there is a difference between those temperatures due to tip shape, heater replacement, or other factors.

Specification:	
Input Power	100-120Vac 60Hz / 220-240VAC 50Hz
Wattage	150W Watts
Temperature Range	100°- 480° C
Standard Tip	44-413591
