

Mini Soldering Station

Model: LF-389D/399D
Mini-Type Soldering Station

Features:

1. Easy to install and replace, customized is available.
2. It has temperature display, function instructions at a glance, chassis compact, portable, powerful, beautiful.
3. The Soldering iron has automatic detection, protection, alarm function, and more comprehensive protection for product safety and reliability.
4. High temperature automatic protection and alarm functions.
5. The user can according to the use habit, or the device characteristics of assembling and disassembling, to set or storage three difference gun and iron temperature / airflow / display mode / iron sleep time/ gun AUTO and Manual.
6. Manufactory sell directly, the goods are in plenty supply, delivery date fast, good compete price.
7. High power rework.
8. You'll find its really the machine you need by its high integration Design, the smaller workbench, non-mixed cables and the convenient operation –all the process of soldering controlled by a button.
9. The innovative design gets over the problem of ir heating rework station heating slowly and disorderly caused by the air flow. It can easy deal with the solder free soldering.
10. The max temperature is up to 480°C

Specification:	
Input Power	100-120Vac 60Hz / 220-240VAC 50Hz
Wattage	60 / 80W Watts
Temperature Range	150°- 480° C (302°-896° F)
Standard Tip	44-510601
