Computer Servo Control Universal Tensile Testing Machine Lab Test Equipment 1~20KN

Application:

Tensile Testing Machine is an electrically operated machine that is used for testing tensile strength and elongation of materials like plywood, wires, cables, conductors, ferrous and non-ferrous materials.

Features:

1. Force value and deformation can display at the same time.
2. Drive by servo motor, stand-alone can sent testing speed directly.
3. Press Start button the machine will testing automatic after setting.
4. After finishing testing, it can self-return.
5. Fast disassembly joint, can use different kinds grips.
6. Single button testing function, easy operation
7. Direct-connected to printer, print out report.
